## Colliding Continents: A Geological Exploration of the Himalaya, Karakoram, and Tibet

Publisher: Oxford University Press (June 3, 2013)

Language: English

Pages: 368

Size: 22.27 MB

Format: PDF / ePub / Kindle

The Himalaya is the greatest mountain range on Earth: the highest, longest, youngest, the most tectonically active, and the most spectacular of all.

Unimaginable geological forces created these spectacular peaks. Indeed,...
